

BERKER K.1 NEW IN ALUMINIUM AND ANTHRACITE

B.
Berker the right way.

BERKER K.1

Unmistakeable: a truly timeless classic. It has the uncompromising contour of the design award-winning K.1. But the Berker K.1 in aluminium has more than that, namely the cool and modern impression of a mat-finished aluminium tone. It is really superfluous to mention that this makes it the perfect complement to the other K.1 variants. For another exceptionally attractive complement, see the next page.

Berker K.1 combination switch/socket outlet, aluminium mat

ANGULAR CLASSIC IN A NEW TONE

BERKER K.1

UNDERSTATEMENT IN ANTHRACITE

Angular shape. Mat surface. Unobtrusive colour scheme. There's no question: the Berker K.1 in anthracite is understatement and eye-catcher at the same time.

PRODUCT VARIANTS K.1

Variety can be bewildering, but it also accords the freedom to design living spaces exactly the way you like. Our K.1 range follows exactly this philosophy: its great product depth encompasses all of the variants that are needed to realise the most different applications and design concepts.

BERKER B.7 NEW IN ALUMINIUM AND BLACK

B.

Berker the right way.

BERKER B.7 GLAS

Actually one should leave a proven bestseller like the Berker B.7 exactly the way it is – that is, unless one can expand its product range to include another particularly attractive variant. That is exactly what we have done by adding an elegant black and a cool aluminium tone to the B.7 Glas spectrum of colours. These can be combined as usual with the centre inserts of the Berker B.-series, but they are particularly harmonious with those in anthracite or aluminium colours.

Berker B.7 combination switch/socket outlet, glass black

PERFECT FORM IN AN ELEGANT FRAME

BERKER B.7 GLAS

THE BEST OF TWO WORLDS

For anyone who loves transparency and clarity, glass is without a doubt the perfect framework. An aluminium tone, on the other hand, creates a wonderfully functional and modern impression. So why choose? We have quite simply combined a glass frame with an appealing aluminium effect. And now with the Berker B.7 in aluminium we can offer you a flush mounted switch frame that combines transparency and modernity in the best possible way.

PRODUCT VARIANTS B.7

Whether as a switch, a socket outlet or as a combination: the B.7 looks splendid, whatever the variant.
