

296801

ε

Speed controller HVAC-control

Technical features

Main electrical features

Frequency 50/60 Hz

Electric current

Motor nominal and slat current max. 0,1...2,7 A

Fuse

Fine-wire fuse T 3.15 H 250 V

Fuse with spare fuse, short-circuit and overload proof (fine-wire fuse)

Power

Loss power at full load ≈ 5 W

Dimensions

Insertion depth 30,5 mm

Axis dimension Ø 4 mm

Connection

- with plug-in terminals
- additional switching contact for blade control

Settings

- basic speed adjustable

Equipment

Motor for devices with motory drive

- phase cut-on
- with rotary on/off switch

Identification

Application, usage HVAC control

Main design line HVAC-control

Instructions

Information text Possible to change fuse without removing cover.
