

146302

**Central plate 2gang for AMP jacks Central plate system, white, glossy**

Technical features

**Connectivity**

|                                                                           |                                           |
|---------------------------------------------------------------------------|-------------------------------------------|
| Fibre-optic connector                                                     | for AMP fibre-optic couplings MT-RJ jacks |
| - with 30° oblique outlet                                                 |                                           |
| - for AMP modular jacks series 110 Connect cat.3, cat.5, cat.5e and cat.6 |                                           |

**Materials**

|                       |               |
|-----------------------|---------------|
| Colour of design line | white         |
| Colour                | white         |
| Material              | Plastic/metal |
| Surface appearance    | glossy        |

**Dimensions**

|                            |                |
|----------------------------|----------------|
| Indexing dimension (W x H) | 14,7 x 20,7 mm |
|----------------------------|----------------|

**Installation, mounting**

|                   |                                             |
|-------------------|---------------------------------------------|
| Installation mode | for screw fastening, without spreader claws |
|-------------------|---------------------------------------------|

**Equipment**

|                         |
|-------------------------|
| - with supporting plate |
|-------------------------|

**Identification**

|                  |                      |
|------------------|----------------------|
| Main design line | Central plate system |
|------------------|----------------------|

**Instructions**

|                  |                                     |
