## product sheet 80040011

80040011

Architecture	
Fixing mode	flush-mount
Controls and indicators	
- with illuminated programming button	
Connectivity	
Interface	as interface between KNX user module and bus l
Voltage	
Operating voltage over bus	2132 V
Electric current	
	≈ 10 r
Bus current consumption (data transfer)	≈ 101
Materials	
Material	Plastic/me
Dimensions	
Insertion depth	32 n
LED control	
LED	with red programming L
Installation, mounting	
Installation mode	with spreader cla
Connection	
Number of contacts	
- bus connection via connecting terminal	
Settings	
Supported configuration modes	system, ea
Equipment	
Product type:	product type: bus coupling u
<ul> <li>with integrated buzzer for acoustic identification</li> </ul>	on of the device within the system
Use	

Bus coupling unit flush-mounted external temperature sensor, KNX

## Safety

Protection index IP	IP20
Halogen free	no
- with dust protection flap for user interface (AST)	

## Use conditions

Operating temperature	-545 °C
Storage/transport temperature	-2070 °C (storage at > 45°C reduces the service life)
- additional connection for external temperature ser	sor
Identification	
Application, usage	KNX - system units

Product family	product family: system components
Main design line	KNX
