## EnOcean radio wall-transmitter module KNX EnOcean

### Technical features

### Functions

- Single-surface operation in conjunction with suitable radio receivers
- For the transmission of switching, dimming or blind commands to the radio receiver of the EnOcean system

### Connectivity

- each channel can be assigned to any number of radio receivers

### Measurement

Relative humidity (without condensation) 0...95 %

### Battery

- batteryless, maintenance-free device without external power supply

### Materials

Material thermoplastic

Surface appearance matt

### Installation, mounting

Installation mode mounting with frames on even surface, e.g. also for extension of combinations

### Scope of delivery

- with fitting material

### Equipment

Number of radio channels 2

### Standards

General standards IEC 14543-3-10

### Safety

Halogen free no

### Use conditions

Storage/transport temperature -40...85 °C (storage at > 45°C reduces the service life)

- provision of transmission energy through conversion of the mechanical energy on button actuation

### temperatur

Ambient temperature -25...65 °C

### Identification

Application, usage KNX - operating systems

Main design line KNX EnOcean

Secondary design line(s) KNX, EnOcean
